They were able to send someone within hours of my call. The technician diagnosed the problem with our AC unit efficiently and had a fix done quickly. The price for the repair was very fair. Highly recommend.

I can't thank the wonderful and professional folks at 32 Degrees enough! We were without A/C for 2 days and still waiting on the landlord to respond is unacceptable. 32 Degrees was the only HVAC that agreed to come because we rent. Our technician Colby was amazing! They are honest and professional. He said there was no way we could not have air conditioning and came right away. He diagnosed the problem and installed a new compressor for us. I'll take the bill up with the landlord at a later time. Thank again Colby I am beyond appreciative!

I loves these guys!! I've used them at home and work for installs, maintenance and service. They have a good response time, are honest, will explain things and let you make the best decision without trying to sell you something you don't need. They're my go to for all my HVAC needs and I'd never call anyone else!

We had 32 Degrees Heating and Air Conditioning install a new air conditioner. The office staff was friendly, the crew was professional and the craftsmanship was top notch! We will be using them from here on out.

I love everything about this business, and recommend it to everyone. We have had to use multiple businesses over the years and feel that we have finally found a business that is both affordable and reliable. 10/10 definitely recommend.

We recently purchased a house in Searchlight and have had the hardest time finding an AC company willing to come out to do a preventative service and WiFi thermostat install. I reached out to 32 Degrees, and while initially was told w★★★★★r service area, Colby followed up to offer to make the hour trek out (the next day, which happened to be the Thursday before Memorial Day weekend!) and provided a quote of the cost to expect.

Colby texted me the morning of to confirm his arrival time, and he and his colleague Gregory arrived at the time promised. They were both extremely friendly, polite and respectful. The install of the wifi thermostat was a major undertaking - the wiring was an absolute hot mess and they handled it perfectly.

We signed up for their biannual service plan, and will be happy to have them come back for the fall service:

Thank you so much, Colby and Gregory!

Junior and Colby are the absolute best when it comes to your AC needs! Knowledgeable, professional, friendly, prompt are some of their best traits! It was nice seeing you guys again and will 1000% rec★★★★★s to all my friends and family! Thanks for the quick condenser fan motor repair.. made it look easy

I work in property management so I have used this company many times for several properties and they are phenomenal at responding. Prompt and professional service. Fast responses eve★★★★★and scheduling. They are honest about tne issue without trying to upsell anything. They offer the best pricing amongst our vendors. Extremely happy with this company.

Replaced a Vivint thermostat with one I can control better and the problems started...65 degrees to start the day and no matter what temp I set it at the heater didn't keep up. Several trips later I a★★★★★d. The heating and AC both were replaced this past spring...I did not incur charges. They tried so many things and finally today the circuit board was replaced. Hope it does the trick. Thank you 32 Degrees for having my back!
